Special observations

1. The use of the ATA Carnet does not preclude the applying of non-tariff regulation measures.
2. When temporarily importing a vehicle following under its own power as well as other exhibition equipment located in such a vehicle for demonstration purposes at an exhibition (fair) or other similar events, such vehicle as well as exhibition equipment may be placed under the customs procedure of temporary admission using the ATA Carnet if the information on such goods, including the vehicle, is listed in the general list of the ATA Carnet. Customs operations related to the movement of this category of goods under the customs procedure of temporary admission may be performed at the republican customs clearance points.
3. When temporarily importing any parts (units, aggregates) which are included in the vehicle for demonstration purposes (or testing) of these parts (units, aggregates), such parts (units, aggregates) cannot be placed under the temporary admission procedure using the ATA Carnet separately from the vehicle. admission. Consequently, the general list of the ATA Carnet should include information about such a vehicle. As a clarification, the information about the parts (units, aggregates) which are contained in such a vehicle and which are supposed to be demonstrated (tested), may be additionally indicated by recording in the "including" field.
